Subject: Smoky Canyon Mine Remedial Investigation/Feasibility Study
Dinwoody Material Source Investigation Work Plan
Final Title Page

Dear Art,

This submittal by the J.R. Simplot Company (Simplot) provides the *Final* Title Page for the *Dinwoody Material Source Investigation Work Plan*, which was submitted as a *Revised Draft* on June 20 and was approved, with submittal of additional information, in the August 9 letter from the Agencies. Simplot is providing this additional information in accordance with the August 2009 Settlement Agreement/Consent Order, as part of the Remedial Investigation/Feasibility Study (RI/FS) conducted under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

In response to the August 9 comment letter from the Agencies, in which a summary was requested of the analytical data already collected for Dinwoody material at Smoky Canyon Mine, a table was prepared and is attached to this transmittal letter (see Table 1 – Dinwoody Selenium Analytical Results Summary). Note that the Dinwoody material is stratigraphically above the Meade Peak at Smoky Canyon and there is no reason to suspect that it contains selenium at elevated concentrations.
